### Graffiti remover

**Area of application:** Special product for removing of paint smearing, lines of felt-tip pens and paint pollutions on absorbent stone- and clinker surfaces.  
For removing strong pollutions on porous materials, e.g., house walls, concrete walls, and sight and noise prevention barriers.

- Properties:**
- Powerful
  - Solvent-free
  - Free from CFC

<b>Technical data:</b>	<b>Nature of the product</b>	Paste
	<b>Colour</b>	Slightly yellowish
	<b>pH value</b>	approx. > 14

**Application:** Be careful with plastic surfaces, do not use on plexiglass.  
Before use, check for material compatibility in an invisible position.  
Unwanted spray paints and paints are penetrated and can be removed easily.  
Apply undiluted using a brush or sponge and allow it to act for 5 to 10 minutes. Treat the surface with a brush or a pad.  
If the pollutions are on a large surface, work from the outside towards the centre!  
Take the diluted paint layer off using an absorbent rag.  
Repeat this procedure for several times using a clean cloth.  
When cleaning of an extremely absorbent substrate, extend the application time to 1 hour and rinse the pores using a high-pressure device.  
If surfaces are cleaned that are coated with water-dilutable varnishes, the application time should be as short as possible.

**Storage:** Always keep containers well closed, out of sunlight and out of reach of children. Do not expose to high temperatures.  
In closed original trading units at room temperature it is stable for at least 24 months.
